

Senior Information Security Analyst

Job Description:

Security Compliance Associates is seeking a Senior Information Security Analyst to join our team of qualified, diverse individuals. This position will be located at SCA corporate location in Clearwater, FL. This senior level information security analyst position is technical and analytical in nature and calls for a fast-learner with a history of technical and business experience.

A successful candidate will need to be able to perform the tasks below along with some other requirements.

Responsibilities include:

- Perform internal security assessments for clients in a manner that provides a comprehensive information security review, including information security, privacy, business continuity, identity management, user access and data integrity while enhancing SCA value, reputation and relationship with client.
- Leverage industry and technical expertise to assist the clients to address more effectively risks associated with their organization
- Identify key risks and controls, controls optimization, including the configuration of controls around security, and business processes across a wide-range of business environments
- Ensure timely completion of tasks per project phase and prepare report of assessment in timely, accurate manner not to exceed internal standards.
- Continue to enhance assessment process, looking for methods to improve accuracy, quality, and depth.
- Seek revenue generating opportunities within existing clients and actively promote and solicit SCA services.
- Maintain and enhance security related tool sets with an emphasis on value.

Knowledge, Skills, Abilities:

- CISSP Certification
- College education
- Other certifications – example includes CEH, CISA, CRISC, CISM etc.
- Solid experience and knowledge of common security controls including firewalls, proxies, IDS/IPS, Web Application Firewalls, Data Loss Prevention products, Internet filtering products, etc.
- Technical knowledge of fundamental Internet protocols, services, and technologies to include HTTP(S), TLS, DNS, SMTP, TCP/IP, ICMP, JSON, REST
- Solid understanding of regulatory requirements relating to financial, medical, real estate and government entities (FFIEC, NCUA, HIPAA, ALTA, GLBA, NYDFS Cybersecurity Regulation, etc)
- Excellent client expectation management and communication skills and the ability to translate technical concepts to business information for executive level staff report review

- Solid prioritization and time management and logical problem identification and diagnosis skills.
- Strong verbal and written communication skills
- Professional presence
- Previous experience with information security assessments
- Working in a close environment with other engineers in a collaborative manner
- Ability to use security assessment software tools to include vulnerability and penetration testing

This position requires up to 50% percent (domestic only) travel

Other:

- Casual dress work environment
- Flexible hours with work from home opportunities
- Bonus Compensation Available
- Health care and other benefits
